

Information for WG14
WG14 N2656

Title: C and C++ Compatibility Study Group Omnibus of WG21 Papers (Feb 2021)
Author, affiliation: Aaron Ballman, Intel
Date: 2021-02-01
Proposal category: Informational

Abstract: This is a list of papers in the WG21 document tracking system that are going to be scheduled for discussion in the C and C++ Compatibility Study Group but are not in the WG14 document tracking system.

C and C++ Compatibility Study Group Omnibus of WG21 Papers (Feb 2021)

Reply-to: Aaron Ballman (aaron@aaronballman.com)

Document No: N2656

Date: 2021-02-01

Introduction and Rationale

The C and C++ Compatibility Study Group is a joint study group between WG21 and WG14. This omnibus paper makes WG14 members aware of the papers in the WG21 document tracking system which are expected to be discussed by the study group.

Compendium of Documents to be Reviewed

P2247R0	C and C++ Compatibility Study Group	Ballman	Corresponds to WG14 N2627
http://www.open-std.org/jtc1/sc22/wg21/docs/papers/2020/p2274r0.pdf			
P2264R0	Make assert() macro user friendly for C and C++	Sommerlad	Corresponds to WG14 N2621
http://www.open-std.org/jtc1/sc22/wg21/docs/papers/2020/p2264r0.html			
P2223R1	Trimming whitespace before line splicing	Jabot	
http://www.open-std.org/jtc1/sc22/wg21/docs/papers/2020/p2223r1.pdf			
P2013R3	Freestanding language: optional ::operator new	Craig	FYI: potentially allowing allocations in freestanding
http://www.open-std.org/jtc1/sc22/wg21/docs/papers/2020/p2013r3.html			
P1949R6	C++ Identifier Syntax using Unicode Standard Annex 31	Downey	
http://www.open-std.org/jtc1/sc22/wg21/docs/papers/2020/p1949r6.html			
P1478R6	Byte-wise atomic memcpy	Boehm	
http://www.open-std.org/jtc1/sc22/wg21/docs/papers/2020/p1478r6.html			
P1315R6	secure_clear	Ojeda	Corresponds to WG14 N2631
http://www.open-std.org/jtc1/sc22/wg21/docs/papers/2020/p1315r6.html
