Notes Replaces N0209

Ada.3.6 Pre-Processor Directives [NMP]

~~This vulnerability is not applicable to Ada. Ada does not use a pre-processor.~~

~~Ada.3.6.0 Status and history~~

~~Ada.3.6.1 Language-specific terminology and Features~~

~~Ada does not use a pre-processor.~~

~~Ada.3.6.2 Description of Vulnerability~~

~~There are no vulnerabilities associated with preprocessed Ada code using Ada technologies. If an application decides to create a preprocessor that translates into Ada, then it is the responsibility of the preprocessing tool to define the syntax and semantics. Any code translated into Ada would be subject to the strong type checking that hallmarks Ada.~~

~~Ada.3.6.3 Avoiding the vulnerability or mitigating its effects in Ada~~

~~None~~

~~Ada.3.6.4 Implications for standardization in Ada~~

~~None~~
